

# TRAVEL PRESS FOR COFFEE YOUR BEST TASTING CUP, ON THE GO

The **smell** of freshly ground beans.  
The rising **steam**.  
The **rich flavor** of those first sips.  
A truly **great cup of coffee has the power to transport and inspire.**

Yet when on the go, we often settle for a convenient cup that falls short.

A harried hustle out the door.

A crowded commute.

Back-to-back meetings.

Chasing after the kids.

The outdoor adventure.

At ESPRO, we love great coffee.

So, when we could not find a perfect travel brewer for coffee, we invented one that delivers!

---

The deep, delicate flavors that only a coffee press produces.

---

The clean, grit-free cup created by our patented, ultra-fine-filtration.

---

Perfect extraction, stopped after plunging, so the last sip tastes like the first.

---

The lasting warmth of our vacuum-insulated, stainless steel vessel.

---

And a leak-proof, easy to clean and dishwasher-safe form.

---

**May your coffee transform your travel.**

- **Stainless steel construction**
- Two stage micro-filter
- Vacuum insulated
- Dishwasher safe
- Designed in Canada
- No nonsense 1-year warranty
- Paper filters available
- Global patents received and pending

Enjoying great coffee in the **ESPRO** coffee travel press is simple

**PREHEAT** • Pre-heat your travel press with a hot water rinse.

**MEASURE** • Measure 20g (4 level tablespoons) of ground coffee into your press. When possible, grind moments before use, medium coarse.

**WATER** • Add hot water, just off boiling.

**WAIT** • Wait 4 minutes (we know it smells wonderful, but do try to be patient!)

**PRESS** • Place filter lid on top & press slowly. Seal with the secondary lid for travel until you are ready to enjoy.

**INDULGE** • At last, the time has come. Indulge in that first sip!
